

ITEM NO.: 18511

CONTENTS: 60 CAPSULES

## WELL STEELED

The greater part of the human immune system (approx. 70%) is situated in the digestive tract. There, special bacteria (lactobacilli) and the body's own antibodies (immunoglobulin) pave the way for a normally functioning immune system.

After birth, babies receive these immunoglobulin's with their first mother's milk - the so called Colostrum. Over time, this protection can become weakened through a one-sided diet or other personal circumstance; the lactobacilli do not receive enough nutrition and the quality and concentration of the immunoglobulin is reduced. The natural fortification and constitution of the immune system and the activation of the cells is therefore very important.

Immunizen® activates the body's cells to retain a strong immune system.

This supplement boosts the immune system with a patented form of intact colostrum and other ingredients that supply key immunoglobulins, antibodies, inhibitors, protein compounds, growth factors, and enzymes. Immunizen supports the body's immune cells—especially macrophages—in digesting foreign material, promotes “friendly” intestinal bacteria, protects the body with antioxidants, and helps the body make better use of iron.

- ✓ With patented\* Intact® Colostrum, naturally rich in bioactive immunoglobulin, for effective support of the immune system
- ✓ Easy to digest protein from Colostrum is an optimal nutritional base for the lactobacilli that are believed to provide for a stable immune system in the digestive tract
- ✓ Beta-Glucan, an extract from the yeast cell wall, stimulates the body's cells
- ✓ Arabinogalactan, derived from the larch, is an excellent fiber source that retains a normal digestive flora and is believed to provide a valuable contribution to normal immune functions.

## RECOMMENDED USE

Take 2 capsules of with water at meal times three times a day, Do not exceed the recommended daily dosage.

## INGREDIENTS

Bovine colostrum, arabinogalactan, gelatin, yeast cell wall extract, release agents (stearic acid and lactoferrin), and a stabiliser (silica).

## IMMUNIZEN

AMOUNT PER SERVING	%DAILY VALUE*
PROPRIETARY BLEND	4.05g
COLOSTRUM (INTACT STANDARDIZED TO 15% IGG, BOVINE)	
ARABINO GALACTAN (IMMUNENHANCER AG)	
BETA 1, 3/1, 6 GLUCAN (YEAST CELL WALL EXTRACT)	
LACTOFERRIN (FROM MILK PROTEIN)
